

## How to choose the right size bracelet?

### By measuring the circumference of the wrist

1. Prepare a measuring strip. You can use a tailor's tape measure, or print and cut out a template from this document. It is important to print the document in real, 100% size. Verify the correct size using a ruler.
2. Wrap the measuring strip around the wrist in the area behind the knuckle. The strip should hold firmly, but not press. Mark the where the measuring tape crosses.
3. Measure the measured length and compare it with the table below. This will give you the ideal size for your bracelet. If your readings are between two sizes, we recommend choosing the larger size.

EU Sizes	Wrist circumference (cm)
XS	15
S	16
M	17
L	18
